### Let's Start!

Let's review!

## Learning Outcome

Exchange information about unlikely events or fairly certain conditions that will be fulfilled in the present, past or future in spoken or written texts and in work and social contexts.

## Can Do Statements

- I can express uncertainty about past events.
- I can talk about two actions together.
- I can describe a temporary situation, a mental state or the type of function of a statement.

## Ask your partner:

- What animals do you think make the best pets? Why?
- If you had a dog, what tricks would you train it to do?

## Let's Explore!

**Canine\*** or human? It's tough to tell sometimes.

\* A "canine" refers to a dog.

*Instructions: Read the text aloud.*

Let me just start by saying that I know humans and dogs are different. Really, I do. But there are a few ways in which our personality traits are actually quite similar to those of our canine friends.

First, like humans, dogs are bright and resourceful. Take my dog Coco for example. Last Friday she prevented me from sleeping in by scratching on my bedroom door at 6:00 a.m. She's used to getting her breakfast at exactly that time every day, and she would have thought that this particular Friday was no exception. The problem was that it was Easter Friday, a holiday, and I was looking forward to getting a bit of extra rest. I should have known Coco wouldn't want to do the same. Eventually she got tired of waiting, went into the kitchen, opened a bag of Doritos with her paw and gobbled up the entire thing. I confess that I have a bit of a bias, but I think they are among the most intelligent animals.

Second, dogs are intuitive. Coco always barks at least ten seconds before I hear anyone at the door. I always think that she can't possibly have heard anything, but her doggy sense is far more powerful than my human ears.

Third, canines are kindhearted and personable. She loves having company. Just last week, my brother visited, and Coco must have brought out every single one of her toys and set them at his feet. She wanted to share her most valuable treasures with him. Of course, she also insisted on his scratching her belly in return for her generosity.

Finally, dogs can be cheeky and disobedient. Last week, as I was eating burgers for dinner, she jumped up and grabbed one right off my plate. She instantly realized that she had made a mistake and ran off. She regretted that she had to spend an hour in her cage, surely, but for her the punishment was worth the crime.

## Let's Practice!

I wasn't really sure ...

*Instructions: Underline the sentences that DO NOT express uncertainty about past events. Read the sentences aloud. Check your pronunciation with your instructor.*

1. Dogs are bright and resourceful. Take my dog, Coco for example. Last Friday she prevented me from sleeping in by scratching on my bedroom door at 6:00 a.m. She's used to getting her breakfast at exactly that time every day. She would have thought that this particular Friday was no exception. The problem was that it was a holiday, and I was looking forward to getting a bit of extra rest. I should have known Coco wouldn't want to do the same.
2. Second, dogs are intuitive. Coco always barks at least ten seconds before I hear anyone at the door. I always think that she can't possibly have heard anything. However, her doggy sense is far more powerful than my human ears.
3. Third, canines are kind-hearted and personable. She loves having company. Just last week, my brother visited, and Coco must have brought out every single one of her toys and set them at his feet. She wanted to share her most valuable treasures with him.

## Let's Practice!

What kind of verb is it?

*Instructions: Classify the sentences below by writing their corresponding number in the categories you are given.*

1. She sounds happy.
2. I think they are among the most intelligent animals.
3. She loves having company.
4. She instantly realized that she had made a mistake and ran off.
5. We promise to bring her with us.
6. She regretted that she had to spend an hour in her cage, surely, but for her the punishment was worth the crime.
7. I predict that she wasn't too happy.
8. I confess that I have a bit of a bias.

**State**

**Mental State**

**Performative**

## Extension Activity

Make a Venn diagram.

*Instructions: Complete the following steps. Fill in the Self-Assessment.*

- Draw a Venn diagram consisting of two overlapping circles on a blank piece of paper.
- Above one circle write the heading "Dogs". Above the other, write "Humans".
- In the "Dog" circle, write all of the adjectives you can think of that describe dogs. Do the same for the "Human" circle.
- In the overlapping area, include all adjectives that describe both dogs and humans.

### Self-Assessment

**Yes** **No**

I create a Venn diagram.

☐ ☐

I write adjectives that describe dogs.

☐ ☐

I write adjectives that describe humans.

☐ ☐

I choose several adjectives that describe both dogs and humans.

☐ ☐

## Target Words

- **bright** (adjective): intelligent  
e.g. First, like humans, dogs are bright and resourceful.
- **resourceful** (adjective): having the ability to find quick and clever ways to overcome difficulties  
e.g. Dogs can be very resourceful at getting what they want.
- **intuitive** (adjective): having the ability to find quick and clever ways to overcome difficulties  
e.g. Second, dogs are intuitive.
- **kind-hearted** (adjective): having a kind and sympathetic nature  
e.g. Most dogs are naturally gentle and kind-hearted.
- **personable** (adjective): having a pleasing and attractive manner  
e.g. Third, canines are kind-hearted and personable.
- **cheeky** (adjective): slightly rude or showing no respect, but often in a funny way  
e.g. Finally, dogs can be cheeky and disobedient.
- **disobedient** (adjective): refusing to obey rules or someone in authority  
e.g. A disobedient dog may need to get some training.

### Perfect Modals - Review

Let's review the Perfect Modals - verbs you use to add the meaning of certainty, uncertainty, past possibility and regret.

| Forms                                   | Meaning/Use                                                                                                         | Examples                                                                                                                                            |
|-----------------------------------------|---------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>must have done</b>                   | this is very likely what happened, but you have no way of knowing                                                   | <i>They didn't come to the meeting. They must have been delayed.</i>                                                                                |
| <b>may / might / could have done</b>    | this is possibly what happened, but you have no way of knowing                                                      | <i>I'm not sure why he isn't here yet. He may have been caught in traffic.</i>                                                                      |
| <b>could have done</b>                  | this did not happen even though everything pointed to it being possible - this form is often used to express regret | <i>I could have learned French when I was in Paris, but I didn't apply myself.</i>                                                                  |
| <b>should have / ought to have done</b> | this did not happen even though it was necessary - this form is also used to express regret                         | <i>I should have known Coco wouldn't want to do the same.</i>                                                                                       |
| <b>would have done</b>                  | this did not happen even though that was the original intention - something got in the way of that                  | <i>She's used to getting her breakfast at exactly that time every day, and she would have thought that this particular Friday was no exception.</i> |
| <b>can't have done</b>                  | this is almost impossible to have happened                                                                          | <i>He can't have arrived yet. His bus was delayed.</i>                                                                                              |

### Examples:

- *She's used to getting her breakfast at exactly that time every day, and she **would have thought** that this particular Friday was no exception.*
- *I **should have known** Coco wouldn't want to do the same.*
- *I always think that she **can't** possibly **have heard** anything, but her doggy sense is far more powerful than my human ears.*

## Learning Points

### State Verbs

State Verbs are verbs that talk about a state rather than an action.

Look at the chart for a summary of how and when to use these specific verbs:

| Forms                                              | Meaning/Use                                                                                                           | Examples                                                               |
|----------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------|
| <b>Present Continuous</b><br>+ State Verbs         | the event described is transitory and happens at a past time not far from the present (look, love, sound, like, etc.) | <i>I'm loving this new restaurant. We should come here more often.</i> |
| <b>Present Continuous</b><br>+ Mental States Verbs | it describes a growing awareness of something (find, think, realize, understand, etc.)                                | <i>I'm realizing my boss is completely incompetent.</i>                |
| <b>Simple Present</b>                              | these are verbs which perform the action they describe (advise, confess, deny, permit, suggest, refuse, thank, etc.)  | <i>I admit I made a mistake.</i>                                       |

### Examples:

- *I confess that I have a bit of a bias, but I think they are among the most intelligent animals.*
- *She loves having company.*
- *She instantly realized that she had made a mistake and ran off.*
- *She regretted that she had to spend an hour in her cage.*
